

We are changing the principle of medical data storing and returning control to users with Web 3.0 technology

# About DeHealth

## What we do

DeHealth (Decentralized Healthcare) is a pioneer of MedFi and Web 3.0 healthcare.

DeHealth is a brand and international association of companies with its HQ in the UK and research centers in Israel, the US, Ukraine and New Zealand.

## DeHealth App & DHLT Network

DeHealth App — AI & Medical Data-Based Mobile App. This is a decentralized application (dApp) that allows users to securely and autonomously store their medical data in one storage, share, manage and monetize it using the DHLT token, supporting their health while selling their anonymous data.

The DHLT Network is a decentralized storage for health data and digital assets, data oracles protocol and incentive layer. The DHLT Network is like Chainlink, Filecoin or Ocean Protocol, but only for health data.

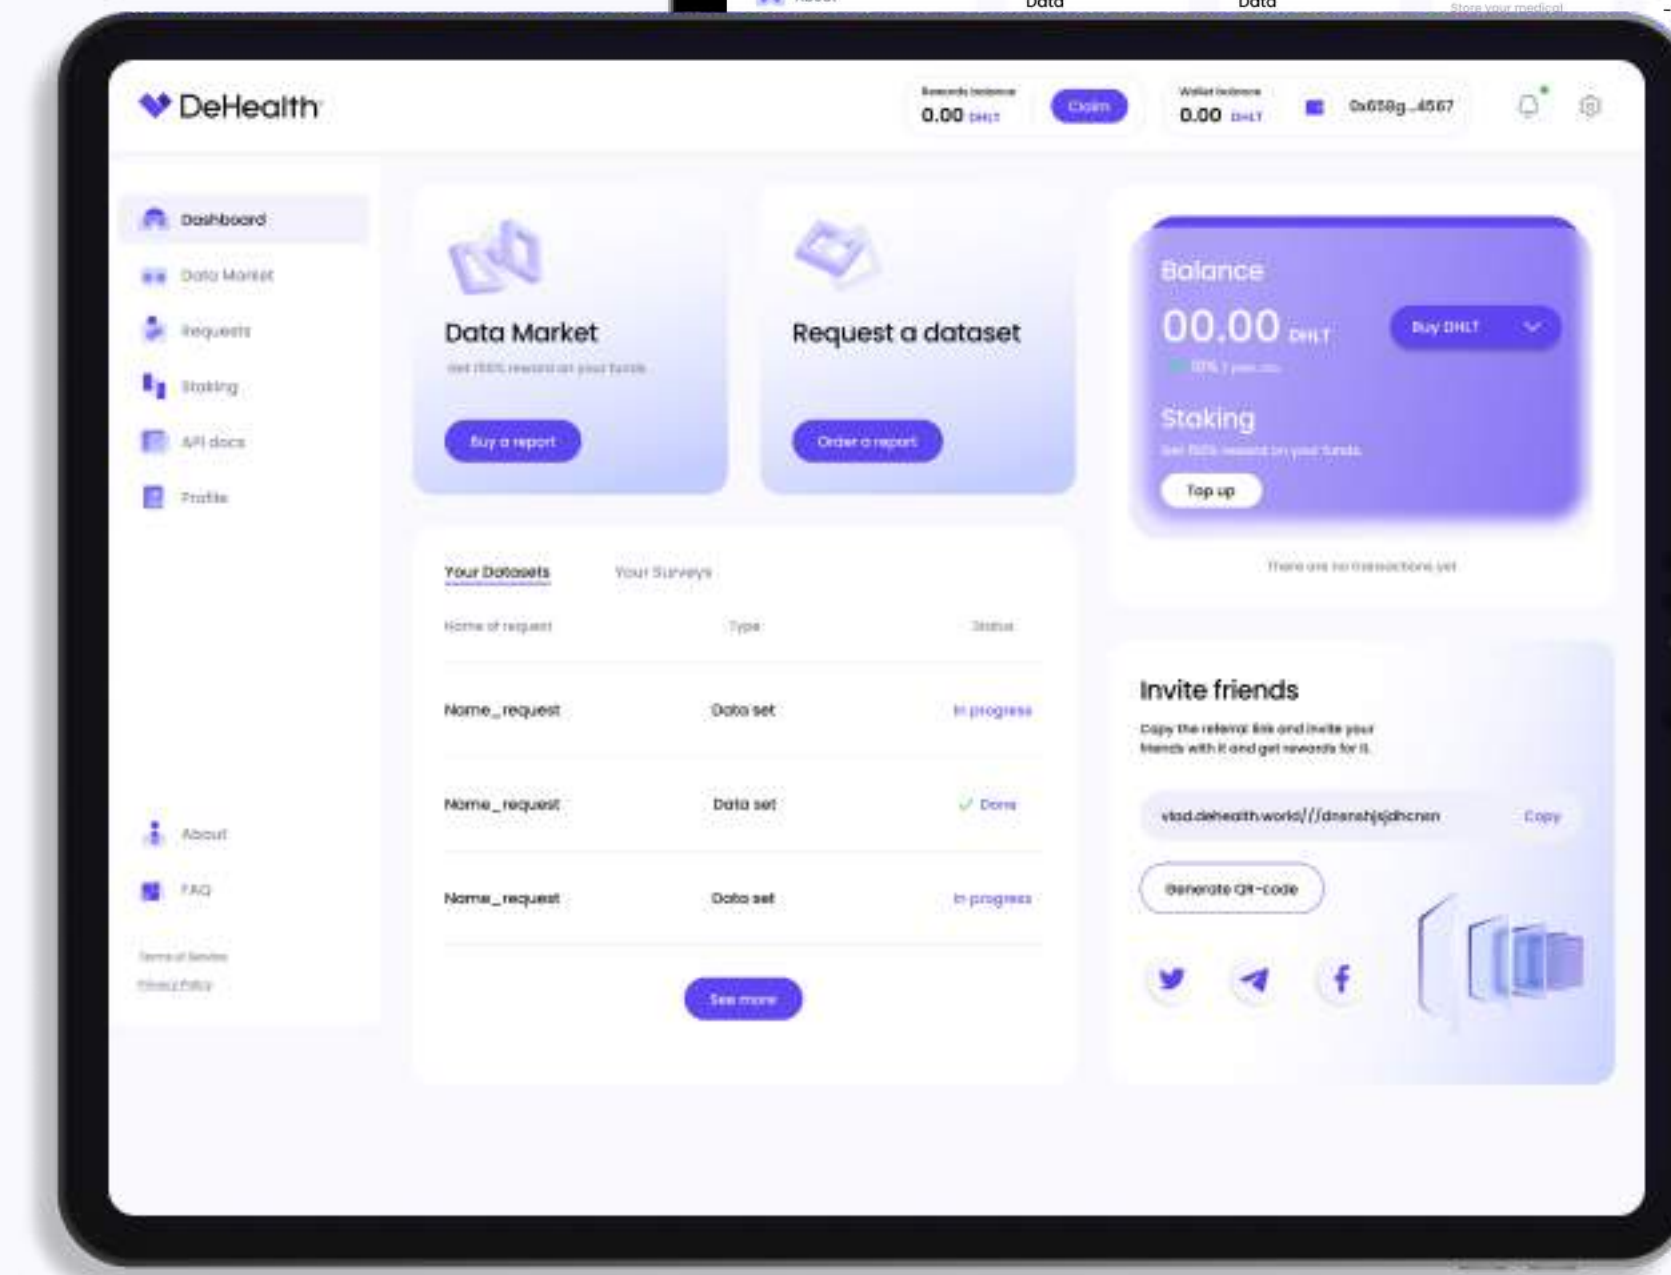

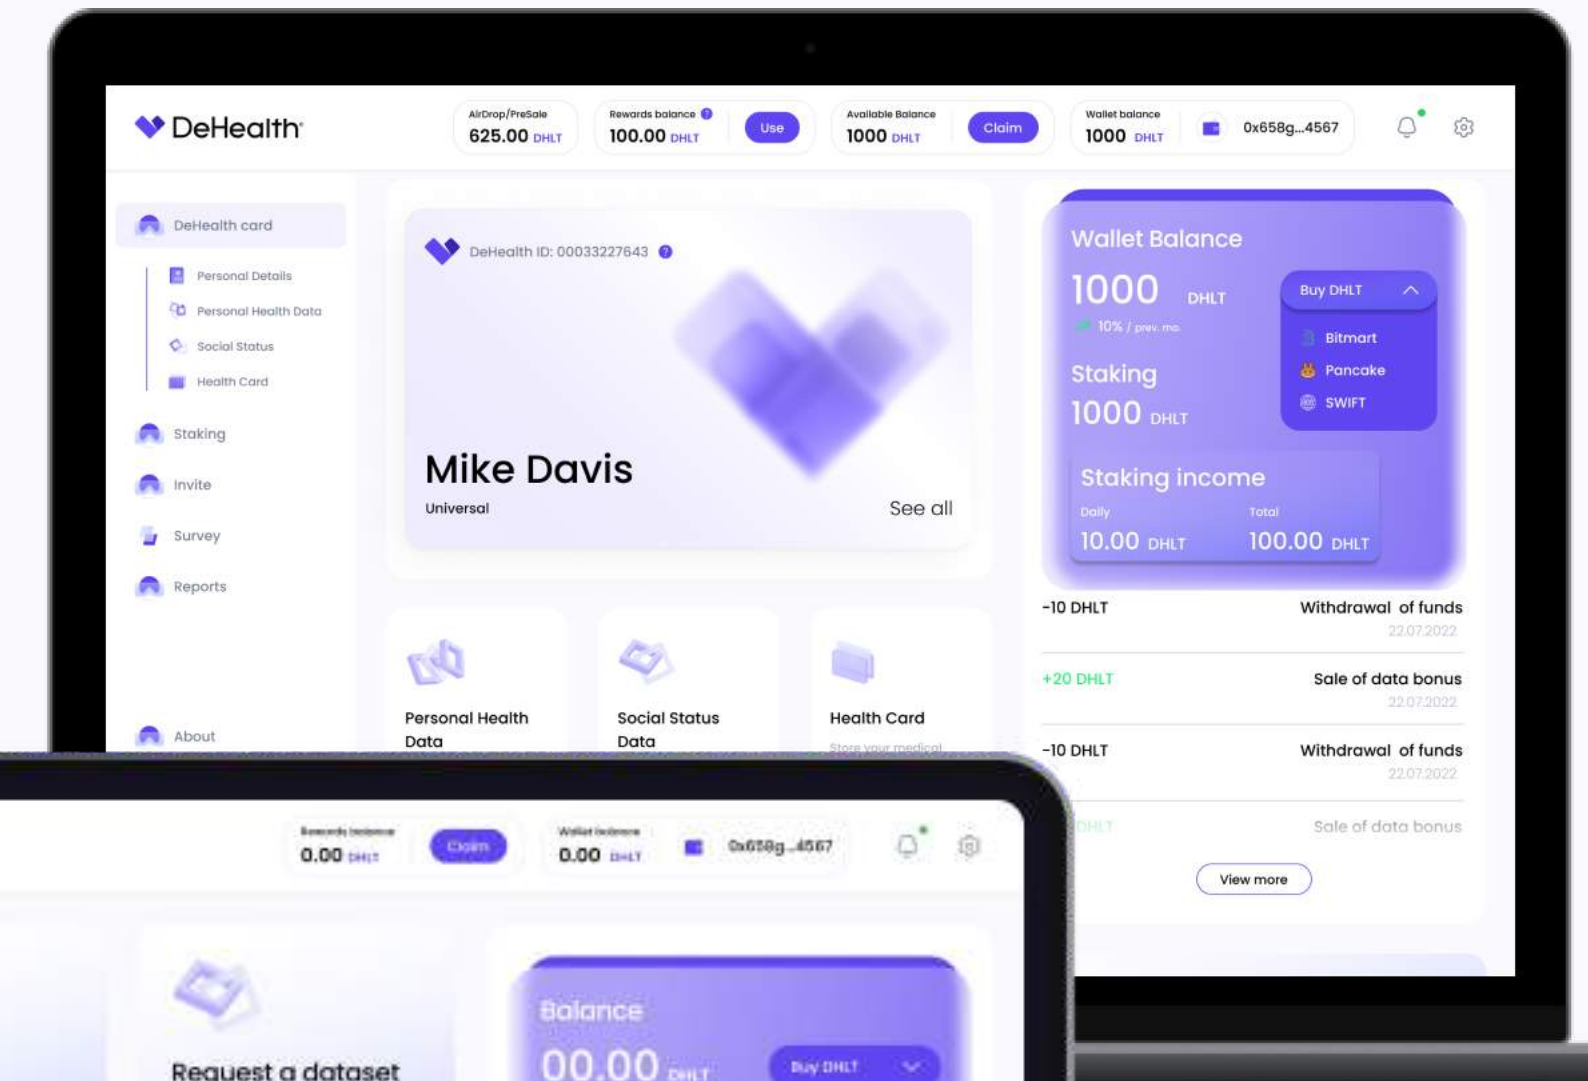

# DeHealth Application

The DeHealth app allows you to monetize and purchase anonymous data. In the **User app**, everyone can get a DeHealth ID and store all their medical records in a single, anonymous, secure online ecosystem.

In the **Client app**, brands, research and pharmaceutical companies can purchase anonymous verified data sets, as well as conduct surveys of various user groups.

Data owner Webapp

Data Buyer Webapp

# Security Standards

DeHealth ensures safe storage of user data and its depersonalized distribution only with the consent of the owner.

DeHealth works according to such global security standards:

Health Insurance Portability and Accountability

California Consumer Privacy Act

Hacken cybersecurity

ISO 27001 standart

Payment Card Industry Data Security Standard

American Institute of Certified Public Accountants

General Data Protection Regulation

# Why choose Web 3.0?

- Improving interaction with users, attracting new users.
- Increasing interactive advertising opportunities, with the help of gamification and metaverse tools.
- Better understanding of your audience thanks to the analysis of data on their interaction with products.
- Building better communication with customers.

Starbucks has partnered with Polygon to implement a Web3 initiative aimed at expanding its customer loyalty program.

Gucci is actively using Web3 technologies with the Gucci Art Vault and its own cryptocurrency.

Nike created the Web3 platform Nikeland to meet its fans, communicate, participate in promotions and engage with customers more.

These and other brands are already actively using Web3 to grow. Join in!

# Active audience

- DeHealth audience is filled with conscious users with a high level of income
- Our subscribers follow innovations and are not afraid to get involved in new technologies
- All users go through KYC, so we are sure that these are real people who are interested in our platform

**60 000+**

Engaged users in 3 weeks

**43+**

Countries on 4 continents

**130 000+**

Active users of our community

**3 000+**

Token holders worldwide

# DeHealth Community

With the help of interesting content and the involvement of top influencers in the field of Web3, we are building an active DeHealth community. Our posts collect 8K+ views with a lot of comments and reactions.

In collaboration with DeHealth, you will be able to increase your audience with interested and active **gen Z users, early adopters, trendsetters**. We will help you successfully launch a promo on the most relevant channels for your product. We also involve top influencers who will natively bring their audience to your brand.

# DeHealth Influencers

Key Opinion Leaders around the world are talking about the DeHealth platform. This helped us gain an active audience that uses our product and follows our news.

We can attract top influencers with a relevant audience to promote your product, who will naturally build interest in your brand. We also use all relevant channels to achieve maximum efficiency in launching promotional campaigns.

Contact us and we'll send you a list of influencers relevant to your brand.

# How it works?

1

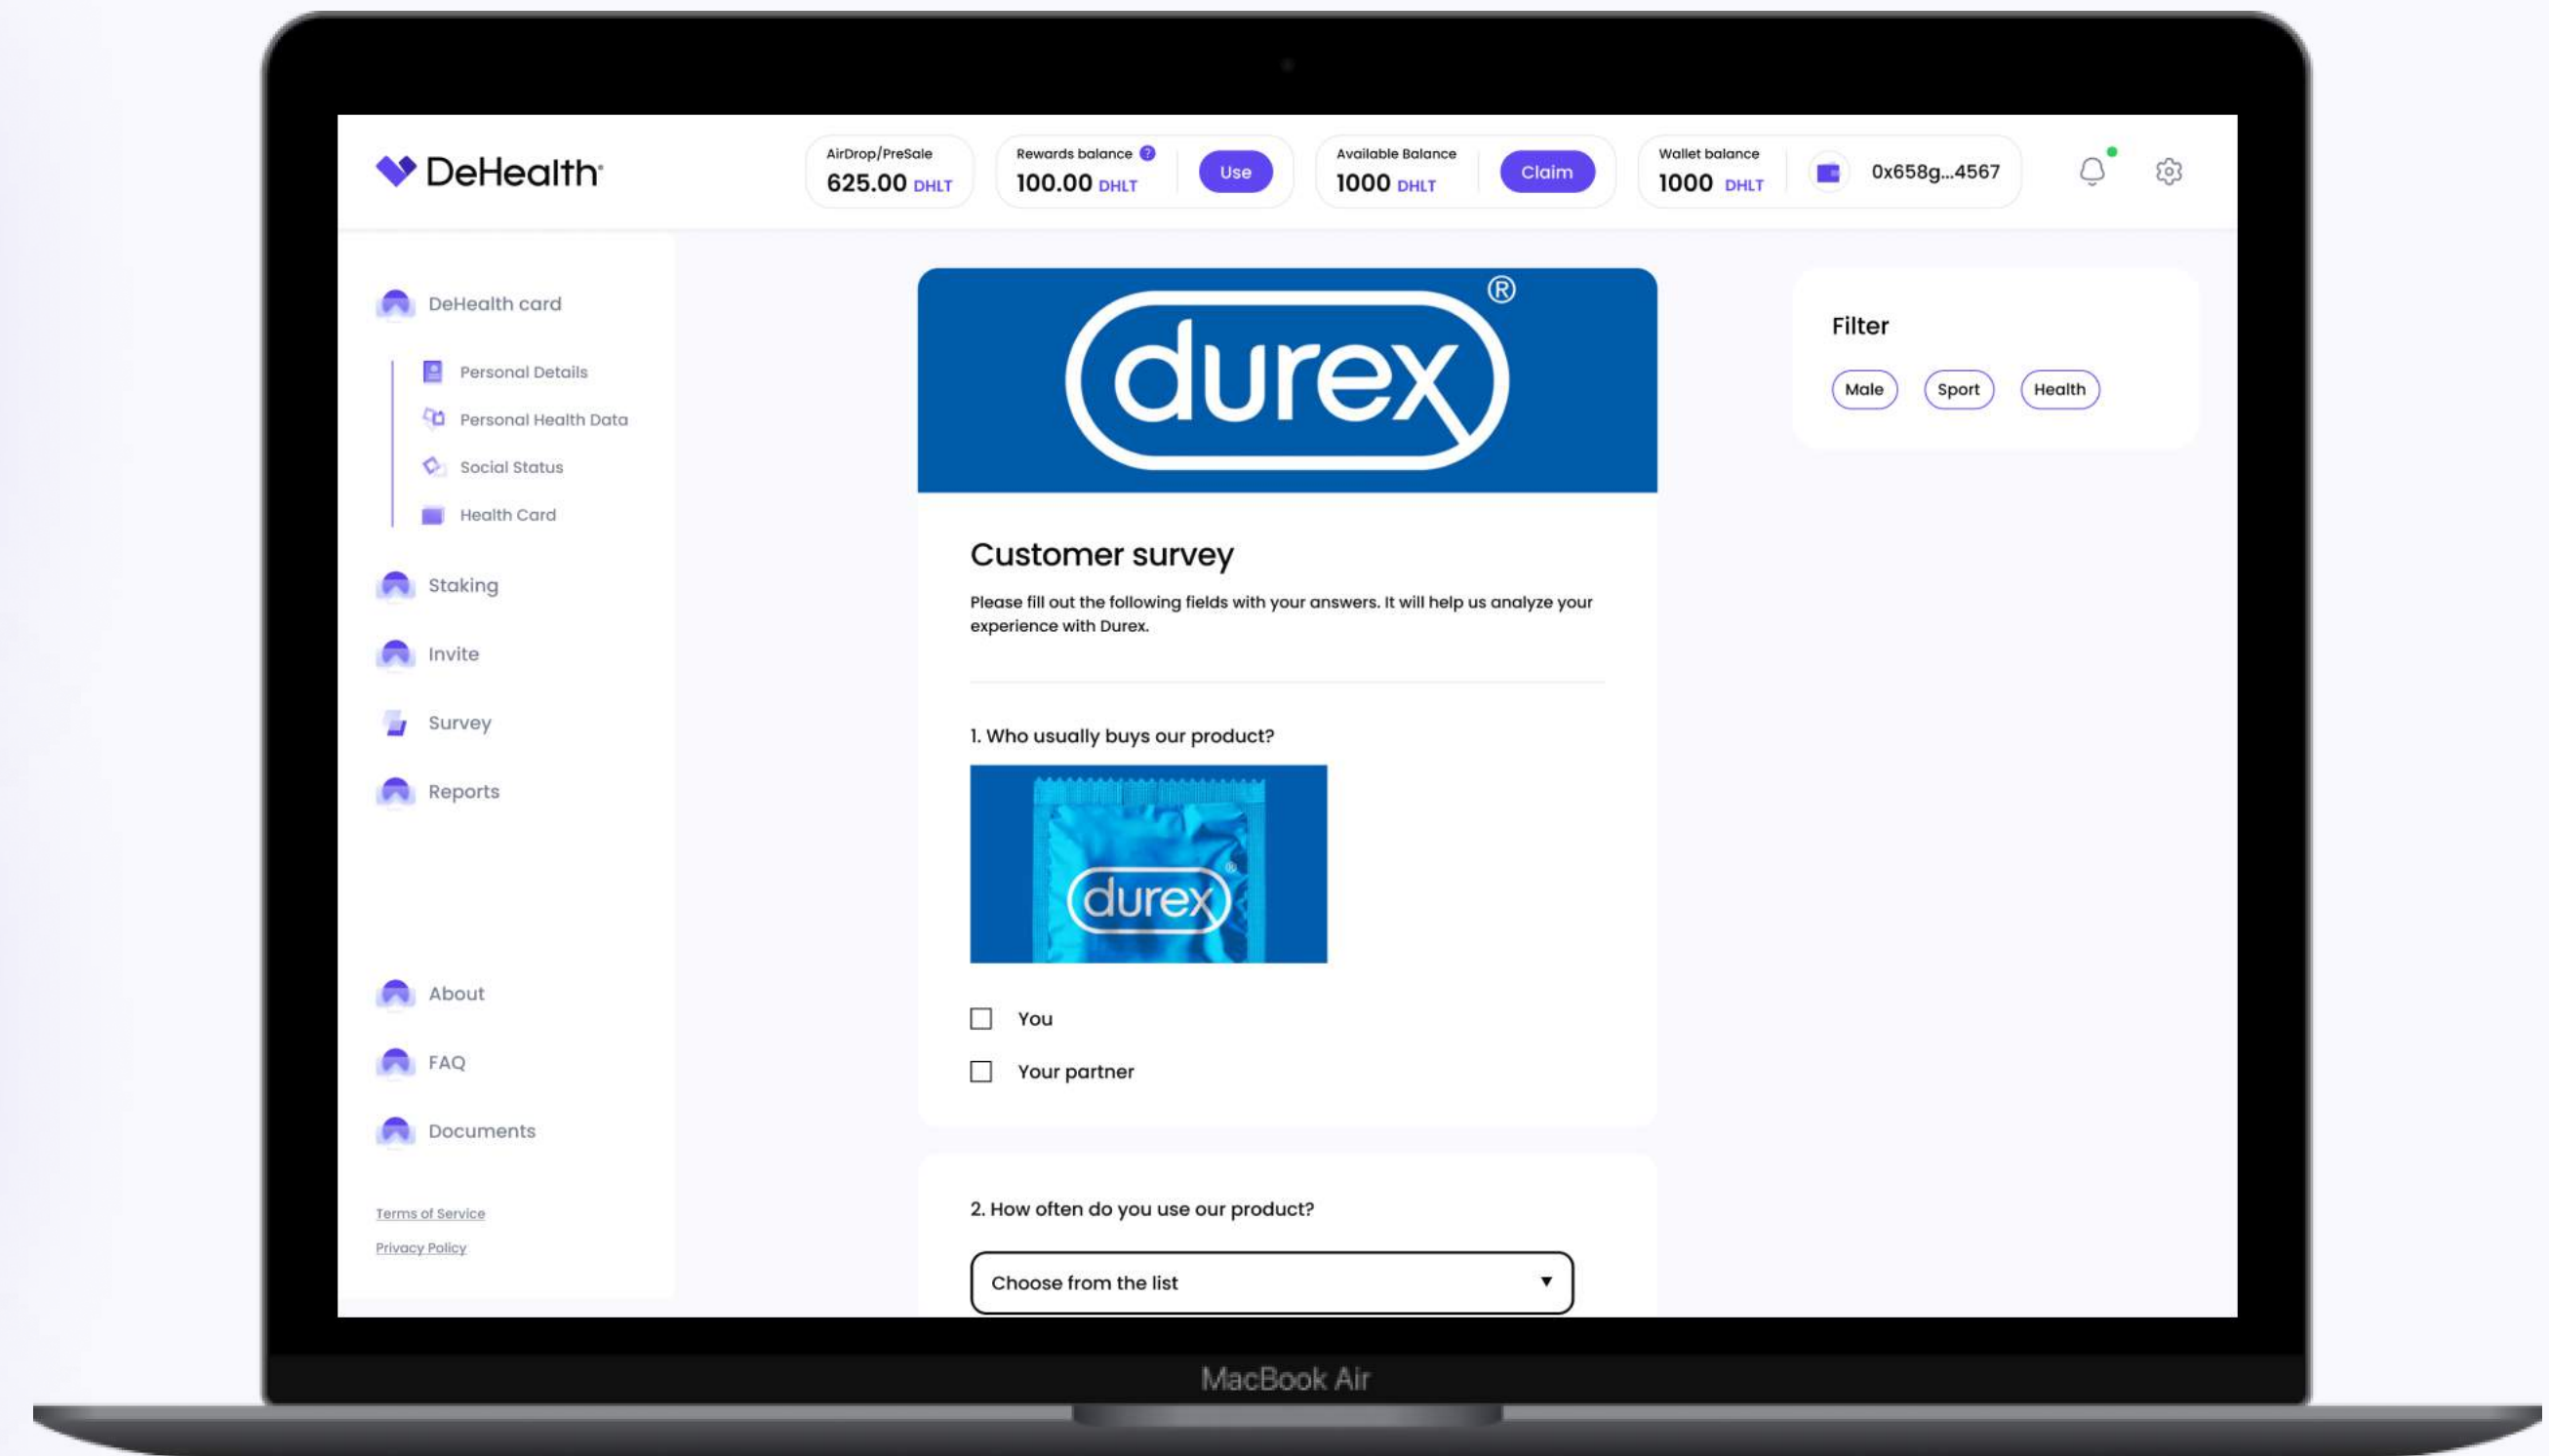

We can help you better understand your customers. Create your Customer ID on our platform and make questionnaires for your customers. On the DeHealth platform, you can also choose the relevant audience for each questionnaire and specify the amount of validated questionnaire data you want to collect.

2

The users who want to fill out the questionnaire go through KYC to verify their identity. After completing the questionnaire, they receive a reward in DHLT tokens.

3

With the help of the DeHealth platform, you will also be able to interact with the audience that is interesting for your brand in a different way by creating collaborations with brands and technology products.

Create a questionnaire asking the selected audience the questions that interest your brand. Easily analyze data from DeHealth to better understand your customers.

# What you get

## Key to User Insight

Use our platform as a tool to create personalized campaigns and obtain relevant user data from real users.

Communicate directly with your audience with the Survey tool. Create, improve and promote products and conduct awareness campaigns. DeHealth is your key to insights about your user.

## Healthy Partnership

Collaborate your product with DeHealth and get access to all our promotional opportunities and influencers, including Chainlink and other leading Web 3.0 companies.

Become part of our promo at the largest digital event in the world, Web Summit, and open up even more opportunities.
